TORONTO- On September 19, 2023, [The Daniels Corporation](#) (Daniels) was awarded the prestigious title of 'The 2023 Ontario Builder of the Year - Large Volume' by the [Ontario Home Builder Association](#) (OHBA) at the Awards of Distinction gala held in Collingwood, Ontario. In addition to this prestigious title, Daniels also won the award for Low-Rise Project Video for Daniels FirstHome Pickering, in partnership with MadHouse Advertising Inc.

Held annually, and since its inception 30 years ago, the OHBA Awards of Distinction recognizes the creativity, innovation and excellence of land developers, builders, renovators, designers, marketers, and service professionals within the Ontario residential construction industry.

The Home Builder of the Year (Large Volume) Award recognizes Daniels with the highest provincial distinction for being a leader in the development industry- one that has consistently demonstrated excellence in its commitment to community development, affordable housing, social impact and the arts throughout the real estate industry.

Through all its initiatives, Daniels continues to push beyond industry standards while maintaining an unmatched dedication to innovation and sustainability in city building.

"This remarkable achievement is a testament to our dedication to building homes that exceed expectations in design and quality and ensuring that our homeowners and tenants love where they live," said Jake Cohen, Chief Operating Officer at Daniels. "We're incredibly proud to be honoured by OHBA with this award as it serves as wonderful recognition as to who we are as a company, one that builds inclusive and sustainable communities that create a better future for all," added Cohen.

As one of Canada's preeminent builders and developers, Daniels takes great pride in building inclusive and diverse communities where everyone belongs, feels welcome and at home. Our complete communities, currently on sale, integrate building excellence with opportunities for social, cultural and economic well-being. These are:
